

2016 Sustainable Destinations Top 100

At the occasion of **World Tourism Day** and **Global Green Destinations Day**, 27-28 September 2016, the **Sustainable Destinations Top 100** is launched for the second time to celebrate the efforts of tourism destinations for responsible and sustainable tourism. The list is the result of open calls in newswires and the social media. Everybody could nominate destinations through a form that was available online. Nominators had to provide extensive information on the destination and on its efforts for sustainability. Information had to be provided about the extent the destination complies with the **15 core criteria of the Green Destinations Standard** (table). **Over 150 nominations** were received. All nominations were evaluated by **experts of the Green Destinations Top 100 Team** and by members of the special **Top 100 Selection Panel**, that included sixty tourism sustainability experts.

The Top 100 initiative aims to recognise tourism destinations that have worked hard to make a difference and take sustainability seriously. Nevertheless, no destination is sustainable for the full 100%. Also in the selected destinations important issues remain to be solved.

Carbon emission of travel could not be taken into account in this competition. However, Green Destinations recommends travellers to avoid long haul travels and to compensate their carbon emission.

The Top 100 selection can be found in: **www.greendestinations.info**. More info: **info@greendestinations.info** 27 September 2016

Criteria (titles) used to evaluate destination nominations:

- Sustainability coordinator
- Sustainable tourism policy
- Nature protection
- Respect for animals
- Protection of landscape & scenery
- Waste water treatment
- Solid waste reduction
- Reduction of fossil fuel dependency
- Cultural heritage conservation
- · Protection of intangible heritage
- · Protection of people
- · Inhabitants involved in tourism
- Promoting local products
- Health & safety prevention
- · Accessibility for disabled
